1 of matting	s the Bource Carus
File Edit View Favorites Tools Help X Norton V Norton Safe Search Seart Ferref Sats Ferref S	can be found on either side of the title page, websites do not have a standard location for that information. If your selected website has met the test for credibility, you will need to locate as much of the following information as you can find for your source card. • Author (if available) • Web Page or Article Title • Web Site Title • Sponsoring Organization • URL (Web Address) • Date Published • Date Retrieved Credible sources typically make this information easy to find, but it won't always be in the same place. If you cannot find it, don't use the site. Directions: Use the website on the left to complete the source card below. Although most of the information above is available, some of it is not. Fill in the card below with the necessary information. Assume that this is the first source card you are completing for your research on the Black-footed Ferret. Black-Footed Ferret Recovery Program What is the first source the program information above is available.

	Name:	
Now that you've had a bit of practice, let's try it	_	~.
with a few more online resources.	Date:	Class:

Go to the Endangered Species Project Website and scroll down to "Source Card Formatting Practice." Select the Ring Tailed Lemur link and then create a source card with a partner.

Be careful... The info you found on the last site may help, but you may not find everything you are looking for in the same place you found it on the Black-Footed Ferret site.

NA Author?	_	Consider the location of the prompts for locating the parts of the source card. If those parts can fit on one line, that is fine. If not, drop down to the next line.
Sponsoring Organization	Duke Lemur Center Web Site Variational Science Foundation egory/diurnal-lemurs/ringtailed-lemur/>	Separate the elements with period marks. Once you have completed your card, check the answer and see how you have done. Compare the answer to your effort and use the differences to ask questions about this process.
NMS Computer Lab Place Accessed	Jan 23 rd , 2012 Date Accessed	Now try the process with a periodical accessed online.

Use the Galileo database
Science link to access
Middle Search Plus, and
then complete a search on
Gorillas and
Endangered. Select
"No More Gorillas?"
and complete a source
card for it. (The Citation Machine)
can help you determine what you need
to record on your source card.

If you remove the box that includes the online information, you have a standard card for a periodical. Easy isn't it.
